Combi-Tanks

We offer a range of ADR & BSI certified Combi-Tanks which are a safe, clean and secure way of transporting both Diesel and AdBlue to and from a job site avoiding the need for a second tank. Reducing downtime and increasing overall productivity of the machines. Available in 4 sizes for the diesel storage. The AdBlue storage is separate to the diesel tank which comes with its own independent pump, hose and nozzle.

Features

- Secure lockable lid.
- Submersible AdBlue pump (12V).
- Maintenance shut-off valve.
- Pump mounted on an anti-vibration plate for reduced noise omission.
- Automatic dispensing nozzle with a 4m hose.
- Forklift accessible on all sides.
- Fitted with D-shackles for secure transportation and alternatively can be used for lifting.

Additional Extras

- Fuel Gauge.
- Pump, power supply 12/24 V.
- Flow meters: PIUSI, KABI, FMT.
- Pumps: KABI, FMT, Adams
- Complete with hydraulic struts.
- Fitted solar panels and lights.
- Digital flow metre counter.

Combi-Tanks

CODE	DIESEL CAPACITY	ADBLUE CAPACITY	DIMENSIONS (MM)
TTC 200	200 Ltrs	40 Ltrs	1220 L x 800 W x 610 H
